

Microsoft 365 inventory

Acme Corp

Based on the licenses declared by your tenant, read-only.

Generated on October 19, 2026

Free scan

1. Key points

€10,168.50

License spend per month

335

Purchased seats

285

Assigned seats

50

Unassigned seats

Your tenant has 5 active plans: 335 purchased seats, 285 of them assigned.

50 seats are paid for and assigned to nobody, i.e. **€1,523.30** a month. It is the simplest line to reclaim: no usage analysis is needed to establish it.

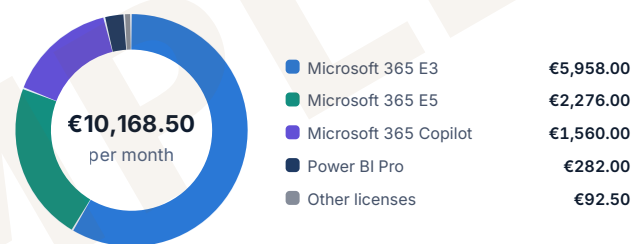

Your seats

Purchased seats, assigned or not

Where the spend goes

Monthly cost per priced license

2. Your Microsoft 365 licenses

Every Microsoft 365 plan active on your tenant, with purchased seats and seats actually assigned. Free plans, trials and self-service pools show at €0 and are excluded from the totals: they are not billed per seat.

License	Purchased	Assigned	Unassigned	Cost / month
Microsoft 365 E3	180	162	18	€5,958.00
Microsoft 365 E5	40	31	9	€2,276.00
Microsoft 365 Copilot	60	48	12	€1,560.00
Power BI Pro	30	19	11	€282.00
Exchange Online (Plan 1)	25	25	0	€92.50

Amounts estimated from Microsoft public list prices as of July 28, 2026 and September 27, 2026. Your contract (CSP, EA, negotiated discount) may differ: these figures are an order of magnitude, to be checked against your invoice.

3. Going further

This report inventories, it recommends nothing. Audit Spring identifies disabled accounts and inactive users still holding a paid seat, with an estimated saving per user: one scan, one report, a 30-minute debrief. Pilot adds usage analysis: apps used by each user, inactive Copilot seats, scans rerun from the portal for 12 months (up to 5 a day).
